2015-17 Small Grant Application JULY 2017

| III. Project Information  |
|---|
| Priority Watershed Concern: the project will address — Check One Only.  |
| Instream Process & Function   |
| Small Grant Team Priority Project Type(s) addressed by the project (list specific eligible project type):   |
| Riparian Process and Function (Manage Nutrient and Sediment Inputs): limit stream access for watering in combination with fencing a riparian area   |
| 1-a. Is the project consistent with the local watershed assessment or action plan?  X Yes Name primary assessment/plan Umatilla/Willow Subbasin Plan  No N/A—The watershed does not yet have an assessment or action plan   |
| 1-b. Is the project consistent with the local Agricultural Water Quality Management Area Plan?  X Yes No  |
| 1-c. Is the project consistent with any developed plan for the property (e.g., local conservation or stewardship)? Yes X No If yes, name the plan(s):   |
| 2. Describe the current watershed PROBLEM(s) you are seeking to address.  McKay Creek flows through the Thompson property, downstream of the McKay Reservoir. McKay Creek pours directly into the Umatilla River. The landowner has six head of cattle that use an existing water gap. The existing water gap ramp is muddy and steep. Electric fencing currently excludes livestock from the creek on both banks, but is not as reliable as permanent fencing. Nutrient and sediment inputs into McKay Creek, and eventually the Umatilla River, can adversely affect salmon and steelhead in those waterways.   |
| 3. Describe the SOLUTION(s) you are proposing to address the current problem(s). Attach a site map, color photo(s), and (if applicable) preliminary project drawings or designs.  The water gap ramp would benefit from a hardening material to reduce mud sloughing into the stream and to provide better traction for the cattle. Four-wire fencing (2 wires barbed with top and bottom wires barbless for wildlife) on both banks of McKay Creek north of the bridge on the property would provide a more effective and reliable barrier to protect McKay Creek from livestock grazing in pastures adjacent to the creek. All fence and water gap construction will be completed by the landowner. All construction will follow NRCS guidelines. |
| <b>4. Insurance Information</b> If applicable, select all the activities that are part of your project (check all that apply). You will be required to submit the DAS Risk Assessment Tool for items 1-5:   |
| $\  \  \  \  \  \  \  \  \  \  \  \  \  $   |
| 2. Earth moving work around the footprint of a well   |
| 3. Aerial application of chemicals  |
| 4. Transporting individuals on the water  |

**10. Project Partners.** Show all anticipated funding sources, and indicate the dollar value for cash or in-kind contributions. Be sure to provide a dollar value for each funding source. If the funding source is providing in-kind contributions, briefly describe the nature of the contribution in the Funding Source Column. In the Amount/Value Column, provide a total dollar amount or value for each funding source.

| Funding Source Name the partner and contribution    | Cash         | In-Kind | Amount/<br>Value |
|---|--------------|---------|------------------|
| OWEB:   | 4,245        |         | 4,245            |
| Landowner:  |              | 1,280   | 1,280            |
| Umatilla County SWCD:                               |              | 9       | 9                |
|   |              |         |                  |
|   |              |         |                  |
| Total Estimated Funds (add all amounts in the far r | ight column) |         | \$5,534          |

The total should equal the total cost of the project on page 1

11. Project Budget (Word). Itemize projected costs for each budget category that apply to your project. A minimum of 25% match is required. See application instructions and additional team conditions for further guidance.

PLEASE NOTE: Budgets may be submitted in either Word or Excel formats. Forms can be found here: <a href="http://www.oregon.gov/OWEB/GRANTS/smgrant\_forms.shtml">http://www.oregon.gov/OWEB/GRANTS/smgrant\_forms.shtml</a>

Fill in the amounts, rounded to the nearest dollar; please do not include cents.

We, the undersigned, attest that to the best of our knowledge the information contained in this application is true, that the proposed project is not required by a state or federal agency directive, and that the project will be completed within 24 months from the date of the team funding recommendation of the application. We understand that the submitted application is a matter of public record.

#### Also, should funding for this project be awarded we understand:

- 1) **We may not incur** any project expenses until all designated signatories have signed an OWEB grant agreement,
- 2) We will be required to provide proper accounting of project expenses, and
- 3) **We will be required to provide** necessary and normal maintenance to sustain the value of the project once it is completed.

By their signatures, the **landowner(s)** attest that they have no plans to sell their property as of the date of this application, are authorized to sign as landowner, and they agree to provide, upon prior request and at a mutually acceptable time, site access to the applicant or representatives of OWEB for a period up to two years following project completion to allow project work to be implemented, monitored, and maintained.

### Racial and Ethnic Impact Statement

This form is used for information purposes only and must be included with the grant application.

Chapter 600 of the 2013 Oregon Laws require applicants to include with each grant application a racial and ethnic impact statement. The statement provides information as to the disproportionate or unique impact the proposed policies or programs may have on minority persons in the State of Oregon if the grant is awarded to a corporation or other legal entity other than natural persons.

| 1. 🗆                      | The proposed grant project policies or programs could have a disproportionate or unique <b>positive</b> impact on the following minority persons:  |
|---------------------------|--|
|                           | Indicate all that apply:  Women Persons with Disabilities African-Americans Hispanics Asians or Pacific Islanders American Indians Alaskan Natives   |
| 2. 🗆                      | The proposed grant project policies or programs could have a disproportionate or unique <b>negative</b> impact on the following minority persons:  |
|                           | Indicate all that apply:  Women Persons with Disabilities African-Americans Hispanics Asians or Pacific Islanders American Indians Alaskan Natives   |
| 3. 🗆                      | The proposed grant project policies or programs <b>will have no</b> disproportionate or unique impact on minority persons.   |
| polici<br>provi<br>I HERI | checked numbers 1 or 2 above, on a separate sheet of paper, provide the rationale for the existence of es or programs having a disproportionate or unique impact on minority persons in this state. Further de evidence of consultation with representative(s) of the affected minority persons.  EBY CERTIFY on this day of , 20 , the information contained on this form and any hment is complete and accurate to the best of my knowledge. |
|                           | Signature<br>Printed Name:<br>Title:   |

<sup>&</sup>lt;sup>1</sup> "Minority persons" are defined in SB 463 (2013 Regular Session) as women, persons with disabilities (as defined in ORS 174.107), African-Americans, Hispanics, Asians or Pacific Islanders, American Indians and Alaskan Natives.

### **Restoration Metrics Form**

OWEB receives a portion of its funds from the federal government and is required to report how its grantees have used both federal and state funds. The information you provide in the following form will be used for federal and state reporting purposes.

Please complete all portions of the form below as they apply to your project and submit all pages (do not exclude any pages). Please provide specific values, do not enter values like "2-3" or "<100". Enter your best approximation of what the project will accomplish.

If you have any questions, please contact Cecilia Noyes, OWEB Federal Reporting Coordinator, at 503-986-0204 (cecilia.noyes@state.or.us) or Ginger Lofftus, OWEB PCSRF Reporting Assistant, at 503-986-5372 (ginger.lofftus@state.or.us)

|    | . Land Use Setting: CHECK ONE BOX ONLY.  |  |  |  |  |  |  |
|----|--|--|--|--|--|--|--|
|    | Urban/Suburban/Exurban (Projects located within<br>urban growth boundaries or rural residential<br>areas)  | Rural (Projects located outside urban growth boundaries or rural residential areas.)             |  |  |  |  |  |
| 2. | <b>Dominant Watershed Setting: CHECK ONE BOX ONLY</b> in the upland area with some erosion control extended occur in the upland area, you would check <u>only</u> the Up | to the riparian area. Because most of the work is to   |  |  |  |  |  |
|    | Estuary (where freshwater meets and mixes with saltwater of ocean tides.)  | Riparian (adjacent to a water body, within the active floodplain.)                               |  |  |  |  |  |
|    | ☐ <b>Instream</b> (below the ordinary high-water mark or   | Upland (above the floodplain.)   |  |  |  |  |  |
|    | within the active channel — includes fish passage.)  | Groundwater (Projects that recharge groundwater or primarily affect the subsurface water table.) |  |  |  |  |  |
|    | Wetland (areas inundated or saturated by surface sufficient to support a prevalence of vegetation types.)  |  |  |  |  |  |  |
| 2  | Total Acres Treated: 1.6 Total Stream Miles Tre (do not include upstream stream miles made accessible  |  |  |  |  |  |  |
| ა. | Project Monitoring: All OWEB funded restoration proje  | ects require post-implementation status reporting  |  |  |  |  |  |
|    | including photo point monitoring. Please indicate below relative to the project, including photo point locations, and 3) whether additional monitoring will be conducted | . 2) whether effectiveness monitoring is planned,  |  |  |  |  |  |
|    | including photo point monitoring. Please indicate below relative to the project, including photo point locations,  | , 2) whether effectiveness monitoring is planned, ed for this project.                           |  |  |  |  |  |

| <b>4.3)</b> Will this project conduct monitoring activities <b>beyond the</b> reporting and photo point monitoring?   |  |

| ☐ Noxious weed (Presence/Absence)   | ☐ Photo Points   |
| ☐ Riparian vegetation (Presence/Absence)  | Other (explain):   |
| line that is not appropriate to your application. All data entered in project. Data about completed projects will be reported at the en Restoration Inventory (OWRI). For each activity type where you en cost of the project (OWEB and all other funding sources, shown in activity. The sum of all of the activity cost percentages should equ project management and other general project costs among the percentages.  Example: A project will remove a fish passage barrier, place large You would enter the appropriate metrics into the Fish Passage, Inst sections of this form. Then, estimate the percentage of the total co 20% towards Fish Passage activities, 25% towards Instream Habitat activities. | and of the project to the Oregon Watershed ter metrics, estimate the percentage of the total III. 9. of this application) that applies to the all 100%. Please distribute all administrative, various project activities when estimating boulders instream, and plant a riparian buffer. Tream Habitat, and Riparian Habitat activity out of the project for each activity. For instance: activities, and 55% towards Riparian Habitat |
| <b>Fish Screening Projects:</b> Projects that result in the install prevent fish from passing into areas that do not support fish surviv channels.  |  |
| Note: OWEB funds cannot be used for fish screening projects   |  |
|   | ied to fish screening activities   |
| New Fish Screens Installed  |  |
| # Estimate the number of <b>new</b> screens installed (do not coureplaced)  | unt diversions where existing screens are  |
| cfs Estimate the cubic feet per second of flow influenced by  | new screen(s) installed (to nearest 0.01 cfs)  |
| Existing Screens Replaced, repaired or modified   |  |
| # Estimate the number of <b>existing</b> screens replaced, repair   | ed or modified   |
| of Estimate the cubic feet persecond of flow influenced by  | a existing screen(s) screens (to pagreet 0.01 ofs)   |

**Fish Passage Improvement:** Projects that improve fish migration by addressing a migration barrier problem. Complete sections A-E as they apply to the proposed project. For projects that improve fish passage at road crossings complete both sections A (define the problem) and B (define the treatment). Non-road crossing improvements are reported in sections C and D. Section E should be completed for all fish passage improvement projects. Refer to the application instructions for additional information and examples.

### A. Road Crossings – Define Existing Fish Passage Problem

| 1. Culverts hindering fish passage | # crossings |
|------------------------------------|-------------|
| 2. Bridges hindering fish passage  | # crossings |
| 3. Fords hindering fish passage    | # crossings |

#### B. Road Crossings – Define the Fish Passage Improvements to be implemented by this project

| 1. Culverts installed/improved -Improvements include installing baffles inside culverts or installing/improving engineered bypasses (e.g. weirs) directly below a culvert outlet to improve passage. | # crossings | str. mi with improved access* |
|--|-------------|-------------------------------|
| <b>2. Bridge</b> s installed/improved -Improvements include installing/improving engineered bypasses (e.g. weirs) directly below a bridge crossing to improve passage.                               | # crossings | str. mi with improved access* |
| 3. Fords installed/improved  | # crossings | str. mi with improved access* |
| <b>4. Road Crossings removed</b> and <u>not</u> replaced   | # crossings | str. mi with improved access* |

#### C. Fish Passage Barriers – Other than Road Crossings

| Type(s) of barriers to be treated/removed to improve fish passage.         | Diversion Dam Push-up Dam Wood or Concrete Dam Weir (not associated with a road crossing) Logs Debris Boulder/Rock Barrier (not weirs) Landslide Other (explain) |
|--|--|
| 2 # Estimate the total number of <b>non-road</b> crossing barriers (listed | d above) to be removed or altered to improve   |
| passage.   |  |

#### D. Fish Ladders or Engineered Bypasses (not associated with Road Crossings)

| 1. Fish ladders will be installed/improved  | # fish ladders to be installed/improved        |
|---|--|
| 2. Engineered bypasses will be installed/improved. This includes weirs, rock boulder step pools, and chutes constructed/roughened in bed rock. Do not count engineered bypasses located at a road crossing to improve passage at the crossing. These types of improvements should be identified above in section B as a Road Crossing Fish Passage Improvement. | # engineered bypasses to be installed/improved |

#### E. Fish Passage Summary Metrics

| $1{}\%$ Estimate the percentage of total cost of the project applied to fish passage improvemer | 1. % | Estimate the p | ercentaae d | of total co | ost of the | proiect | applied t | o fish | passage impr | ovemen <sup>.</sup> |
|---|------|----------------|-------------|-------------|------------|---------|-----------|--------|--------------|---------------------|
|---|------|----------------|-------------|-------------|------------|---------|-----------|--------|--------------|---------------------|

2. \_\_\_\_mi Estimate the total stream miles that will be made more accessible in the main channel and tributaries above the project (to nearest 0.01 mile). This metric summarizes the stream miles for all of the proposed passage improvements (defined above in Sections A-D). If a barrier exists upstream of the project, report the length made accessible up to that next upstream barrier.

<sup>\*</sup>Estimate stream miles in the main channel and tributaries made more accessible above the crossing(s) (to nearest 0.01 mile). If a barrier exists upstream, report the length made accessible up to that next upstream barrier.

| 3 # Estimate the total number of barriers (this included wood or concrete dams, weirs, etc.) to be re   | · · · ·  |
|---|--|
| <b>Instream Flow:</b> Projects that maintain and/or incredimprovements that are primarily designed to improve wa Agriculture Management. <b>Check all proposed activities.</b>                          | nter quality should be reported under Upland –   |
| <ul> <li>Irrigation practice improved to increase instream<br/>flows (e.g. install diversion headgate, replace<br/>open ditches with pipes)</li> </ul>  | ☐ Water flow gauges installed to measure water use   |
| ☐ This project will dedicate instream flow.   | Other (explain):   |
| % Estimate the percentage of total cost of the pr   | oject applied to instream flow activities  |
| mi. Estimate the miles of stream where increased flewithdrawals   | ow is the result of decreased/eliminated water   |
| cfs Estimate the increase in flow of water in the stresecond)   | eam as a result of conservation effort (cubic feet per   |
| mm/dd/yyyy Initial start date of irrigation practice  | improvement  |
| mm/dd/yyyy Final end date of irrigation practice in 12/31/9999)   | mprovement (if improvement is permanent enter  |
| mm/dd/yyyy Water lease/agreement initial start do   |  |
| mm/dd/yyyy Water lease/agreement final end date enter 12/31/9999)   | te of no withdrawal (if lease/agreement is permanent,  |
| Instream Habitat: Projects that are designed to imactivities.   | nprove instream habitat conditions. Check all proposed   |
| Channel reconfiguration and connectivity (e.g., creating instream pools, meanders, improving floodplain connectivity, off-channel habitat, removal or alteration of levee or berm, removal of sediment) | Spawning gravel placement  |
| ☐ Channel structure - large wood placement  | Plant Removal/control (instream) List scientific names of plants   |
| Channel structure - boulder placement   | ☐ Carcass or nutrient placement: ☐ salmonid carcass; ☐ fish meal brick; ☐ other nutrient   |
| Channel structure placement ( <u>other</u> than large wood or boulder placements), e.g., engineered structures or deflectors, barbs, weirs, etc.  | Other (explain):   |
| Streambank stabilization through resloping and/or placing rocks, logs (e.g. revetments, gabions, barbs), or bioengineering on streambank  |  |
| % Estimate the percentage of total cost of the pro  | oject applied to instream habitat activities   |
| mi. Estimate the miles of stream to be treated with   | instream habitat treatments (to nearest 0.01 mile)   |
| select carcass/nutrient placements as an instrect project will place salmon carcasses. You estimate   | osts for carcass or nutrient placements. If you do not cam activity, leave this value blank. Example: Your ated that 25% of the total project cost will apply to instream improvements costs will apply to the carcass |

| Riparian planting  | ☐ Non-native/noxious plant control   |
|--|--|
| X Riparian exclusion fencing   | <ul> <li>Vegetation management (e.g. prescribed<br/>burnings, stand thinning, stand conversions,<br/>silviculture)</li> </ul>  |
| Livestock exclusion by means other than fencing (includes placing obstacles to exclude livestock, people, vehicles, etc., but not for individual plant protection)   | Debris/structure removal (OWEB funds cannot be used for general trash removal)   |
| Water gap development (fenced livestock crossing or livestock bridge)  | Other (explain): Do not report livestock<br>water developments here, report livestock water<br>developments under upland habitat treatments.                                     |
| 00% Estimate the percentage of total cost of the   | project applied to riparian habitat activities   |
| ac. Estimate the acres of riparian habitat to be p   | planted (to nearest 0.1 acres)   |
| ac. Estimate the acres of riparian habitat to be to  | reated for non-native/noxious weeds (to nearest 0.1 acre   |
| 6 ac. Estimate the total riparian acres to be treated  | d. (to nearest 0.1 acres)  |
| $\frac{30}{100}$ mi. Estimate the miles of riparian streambank to laream sides treated $\square$ one $\square$ two (Do not double count  |  |
| Jpland Habitat: Projects implemented above the   | ne floodplain. Check all proposed activities.  |
| Planting/seeding for erosion control (e.g., convert from crops to native vegetation, plant area where non-native/noxious weeds removed, grassed waterways, windbreaks, filter strips)  List scientific names of plants | Livestock Manure Management (e.g., feedlot improvements to reduce runoff, relocate/improve manure holding structures and manure piles to reduce/eliminate drainage into streams) |
| Slope stabilization (e.g., grade stabilization, landslide reparation, terracing slopes)  | Upland Livestock Management ( <u>other</u> than livestock water developments), e.g., grazing plans, fencing  |
| Non-native/noxious plant control; _ist scientific names of plants:   | Restore Historic Upland Habitats (e.g. oak woodland, oak savannah, upland prairie restoration)   |
| Juniper removal/control  | Livestock/Wildlife Water Developments  |
| Vegetation Management (other than non-<br>native/noxious plant control or juniper removal, e.g.<br>tree thinning, brush control, burning)<br>List scientific names of plants:  | Erosion control structures not already reported under Upland Agriculture Management or Road Drainage System and Surface Improvements.  |
| Upland Agriculture Management (e.g., no/low-till, wind breaks, filter strips, crop rotation, terracing, water and sediment control basins, grade stabilization and irrigation improvements)                            | Other (explain):   |
| % Estimate the percentage of total cost of the   | project will apply to upland habitat activities  |
| # Estimate the number of livestock/wildlife wat  | er developments  |
| ac. Estimate the acres of upland habitat to be   | treated for non-native/noxious plants (to nearest 0.1 ac   |
| ac.Estimate the total acres of upland habitat to affected by livestock water developments (to  | be treated (do not include acres of upland habitat o nearest 0.1 acres)  |
| not select Livestock Manure Management as<br>Example: Project will relocate a feedlot to red   | duce livestock manure runoff. You estimated that 33% of other activities and one half of the upland improvemen   |

| Road Activities: Projects desi  | gned to improve roc     | ad impacts to w   | atersheds. Check all proposed activities.                        |  |
|---|-------------------------|---|--|--|

### Section 3. Salmon/Steelhead Populations Targeted and Expected Benefits to Salmon/Steelhead

The information provided will be used by OWEB better to meet federal and state reporting requirements. Completion of this section is required but will not be used to evaluate this application for funding.

| This proje | ct is <b>NOT</b> s | specifically | designed  | to bene | efit salmon | or steelhead |  |
|------------|--------------------|--------------|-----------|---------|-------------|--------------|--|
| ► If y     | ou check           | this box, S  | TOP here. |         |             |              |  |

**Targeted Salmon/Steelhead Populations**: Select one or more of the salmon ESUs (Evolutionary Significant Unit) or steelhead DPSs (Distinct Population Segment) that the project will address/benefit. For species where the ESU/DPS name is not known or determined, use the species name with unidentified ESU (e.g., Chinook salmon – unidentified ESU). Additional information on the designation and location of the salmon/steelhead populations can be found at: <a href="http://www.westcoast.fisheries.noaa.gov/maps\_data/species\_population\_boundaries.html">http://www.westcoast.fisheries.noaa.gov/maps\_data/species\_population\_boundaries.html</a>

|                       | unidentified ESU                        |             |                                  |  |  |

**Expected Benefits**: Write a brief description of the goals and purpose of the project and how it is expected to benefit salmon/steelhead or salmon/steelhead habitat. **See Application Instructions for helpful examples.** 

McKay Creek drains directly into the Umatilla River, which is habitat for steelhead and salmon. Excluding livestock from the riparian area and hardening the surface of the water gap ramp will prevent excess sediment and nutrient input from the property into McKay Creek. Excess nutrients and sediment negatively impact steelhead, salmon, and their habitat.

**10. Project Budget**- Itemize projected costs for each of the following "Expense Categories" that apply to your project. A minimum of 25% match is required. See application instructions and additional team conditions for further guidance.

| Totals   | automatic        | ally round t    | to the neares    | t dollar. Plea                         | ase do not include cents.  |
