III. PROJECT INFORMATIO	N	
Priority Watershed Concern: th	e project will address—Check <u>One</u> On	dy:
☐ Instream Process & Function	☐ Riparian Process & Function	☐ Urban Impact Reduction
☐ Wetland Process & Function	☐ Road Impact Reduction	☐ Upland Process & Function
☐ Fish Passage	☐ Water Quantity & Quality/ Irrigation	n Efficiency
Small Grant Team Priority Proj	ect Type(s) addressed by the project (se	ee application instructions):
High Priority-Upland Process a	nd Function	
. 1		
4 7 4 4 4 4 4		
1-a. Is the project consistent wit	h the local watershed assessment or ac	tion plan?
Yes Name primary ass	essment/plan	
□ No		
N/A—The watershed does N/A—The watershed	not yet have an assessment or action plan	1
1-b. Is the project consistent wit	h the local Agricultural Water Quality	Management Area Plan?
Yes No		
1-c. Is the project consistent wit	h any developed plan for the property	(e.g., local conservation or stewardship

2. Describe the current watershed PROBLEM(s) you are seeking to address.

The landowner currently runs cattle during the summer and fall months up on the mountain, close to where West Birch Creek originates. The landowner recognizes that cattle often tend to be riparian loafers, and has noticed that they often congregate down in the bottoms where there is water and lush riparian feed. This has led to concerns over high impact on the riparian area, and therefore the steelhead and salmon that inhabit Birch Creek, further down the stream. The landowner also has noticed the rise of the local elk hear, and wishes to make sure that there is enough resources in her area to provide for both the cattle and the elk.

3. Describe the <u>SOLUTION(s)</u> you are proposing to address the current problem(s). Attach a site map, color photo(s), and (if applicable) preliminary project drawings or designs

By placing 4 troughs strategically near springs, the landowner will be able to reduce the impact the cattle have on the riparian area. The landowner has already installed two water developments of her own and has noticed the more effective grazing pattern the cattle have. By placing the water troughs on top of the mountain, the cattle will stay up from the bottoms and reduce impact on the riparian area and therefore the fish. This will also provide water for the elk and deer that are very prevalent.

If yes, name the plan(s): CSP

9. Project Partners. Show all anticipated funding sources, and indicate the dollar value for cash or in-kind contributions. Be sure to provide a dollar value for each funding source. If the funding source is providing in-kind contributions, briefly describe the nature of the contribution in the Funding Source Column. In the Amount/Value Column, provide a total dollar amount or value for each funding source.

Funding Source	Cash	In-Kind	Amount/
Name the partner and contribution			Value
OWEB:	7,452		7,452
Landowner:	1,241	2,222	2,463
Umatilla SWCD:		22	22
Total Estimated Funds (add all amounts in the far right column)			\$9,937

The total should equal the total cost of the project on page 1

10. Project Budget (Word)—Itemize projected costs for each of the following "Expense Categories" that apply to your project. A minimum of 25% match—cost share—in-kind/cash is required. See application instructions and additional team conditions for further guidance.

<u>PLEASE NOTE:</u> Budgets may be submitted in either Word or Excel (form on website) formats. http://www.oregon.gov/OWEB/GRANTS/smgrant_forms.shtml

Fill in the amounts, rounded to the nearest dollar, please do not include cents.

We, the undersigned, attest that to the best of our knowledge the information contained in this application is true, that the proposed project is not required by a state or federal agency directive, and that the project will be completed within 24 months from the date of the team funding recommendation of the application. We understand that the submitted application is a matter of public record.

Also, should funding for this project be awarded we understand:

- 1) We may not incur any project expenses until all designated signatories have signed an OWEB grant agreement,
- 2) we will be required to provide proper accounting of project expenses, and
- 3) we will be required to provide necessary and normal maintenance to sustain the value of the project once it is completed.

By their signatures, the **landowner(s)** attest that they have no plans to sell their property as of the date of this application, are authorized to sign as landowner, and they agree to provide, upon prior request and at a mutually acceptable time, site access to the applicant or representatives of OWEB for a period up to two years following project completion to allow project work to be implemented, monitored, and maintained.

Racial and Ethnic Impact Statement

This form is used for information purposes only and must be included with the grant application.

Chapter 600 of the 2013 Oregon Laws require applicants to include with each grant application a racial and ethnic impact statement. The statement provides information as to the disproportionate or unique impact the proposed policies or programs may have on minority persons ¹ in the State of Oregon if the grant is awarded to a corporation or other legal entity other than natural persons.

1.		The proposed grant project policies or programs could have a disproportionate or unique positive impact on the following minority persons:
		Indicate all that apply:
		 □ Women □ Persons with Disabilities □ African-Americans □ Hispanics □ Asians or Pacific Islanders □ American Indians □ Alaskan Natives
2.		The proposed grant project policies or programs could have a disproportionate or unique negative impact on the following minority persons:
		Indicate all that apply:
		 Women Persons with Disabilities African-Americans Hispanics Asians or Pacific Islanders American Indians Alaskan Natives
3.	\boxtimes	The proposed grant project policies or programs will have no disproportionate or unique impact on minority persons.
hav	ing a	hecked numbers 1 or 2 above, on a separate sheet of paper, provide the rationale for the existence of policies or program a disproportionate or unique impact on minority persons in this state. Further provide evidence of consultation with stative(s) of the affected minority persons.
		BY CERTIFY on this twenty first day of July, 2016, the information contained on this form and any attachment is e and accurate to the best of my knowledge.
		Signature:
		Printed Name:Kyle Waggoner
		Title:Manager SWCD

¹ "Minority persons" are defined in SB 463 (2013 Regular Session) as women, persons with disabilities (as defined in ORS 174.107), African-Americans, Hispanics, Asians or Pacific Islanders, American Indians and Alaskan Natives.

RESTORATION METRICS FORM

OWEB receives a portion of its funds from the federal government and is required to report how its grantees have used both federal and state funds. The information you provide in the following form will be used for federal and state reporting purposes.

Please complete all portions of the form below as they apply to your project and submit all pages (do not exclude any pages). Please provide specific values, do not enter values like "2-3" or "<100". Enter your best approximation of what the project will accomplish.

If you have any questions, please contact Cecilia Noyes, OWEB Federal Reporting Coordinator, at 503-986-0204 (cecilia.noyes@state.or.us) or Ginger Lofftus, OWEB PCSRF Reporting Assistant, at 503-986-5372 (ginger.lofftus@state.or.us)

Section 1 - Project Overview

Answer all five questions below, even if you have answered a similar question in a previous section in the grant application.

	rban/Suburban/Exurban (Progrowth boundaries or rural resident		Rural (Projects located outside urban growth boundaries or rural residential areas.)

Section 2 - Project Activities Provide values for each Project Activity applicable to your application. Leave to appropriate to your application. All data entered in this form should be what you projects will be reported at the end of the project to the Oregon Watershed Rest you enter metrics, estimate the percentage of the total cost of the project (OWEI III. 9 of this application) that applies to the activity. The sum of all of the activity all administrative, project management and other general project costs among the Example: A project will remove a fish passage barrier, place large boulders institution.	ou plan to do with the project. Data about completed oration Inventory (OWRI). For each activity type where B and <u>all</u> other funding sources, shown in wity cost percentages should equal 100%. Please distributhe various project activities when estimating percentages.
appropriate metrics into the Fish Passage, Instream Habitat, and Riparian Hab percentage of the total cost of the project for each activity. For instance: 20% to Habitat activities, and 55% towards Riparian Habitat activities.	
Fish Screening Projects: Projects that result in the installation of from passing into areas that do not support fish survival, for example, into in	
Note: OWEB funds cannot be used for fish screening projects	
% Estimate the percentage of total cost of the project applied to fish scr	reening activities
New Fish Screens Installed	
# Estimate the number of <u>new</u> screens installed (do not count diversion	ns where existing screens are replaced)
cfs Estimate the cubic feet per second of flow influenced by <u>new</u> screen	(s) installed (to nearest 0.01 cfs)
Existing Screens Replaced, repaired or modified	
# Estimate the number of existing screens replaced, repaired or modifi	ied
cfs Estimate the cubic feet per second of flow influenced by existing scr	

Fish Passage Improvement: Projects that improve fish migration by addressing a migration barrier problem.

Complete sections A-E as they apply to the proposed project. For projects that improve fish passage at road crossings complete both sections A (define the problem) and B (define the treatment). Non-road crossing improvements are reported in sections C and D. Section E should be completed for all fish passage improvement projects. Refer to the application instructions for additional information and examples.

A.	Road	Crossings -	Define	Existing	Fish	Passage Problem
----	------	-------------	--------	----------	------	------------------------

1. Culverts hindering fish passage	# crossings
2. Bridges hindering fish passage	# crossings
3. Fords hindering fish passage	# crossings

B. Road Crossings - Define the Fish Passage Improvements to be implemented by this project

1. Culverts installed/improved - Improvements include installing baffles inside culverts or installing/improving engineered bypasses (e.g. weirs) directly below a culvert outlet to improve passage.	# crossings	str. mi with improved access*
2. Bridge s installed/improved - <i>Improvements include</i> installing/improving engineered bypasses (e.g. weirs) directly below a bridge crossing to improve passage.	# crossings	str. mi with improved access*
3. Fords installed/improved	# crossings	str. mi with improved access*
4. Road Crossings removed and not replaced	# crossings	str. mi with improved access*

C. Fish Passage Barriers - Other than Road Crossings

1. Type(s) of barriers to be treated/removed to improve fish	Diversion Dam
passage.	Push-up Dam
	Wood or Concrete Dam
	Weir (not associated with a road crossing)
	Logs
	Debris
	Boulder/Rock Barrier (not weirs)
	Landslide
	Other (explain)
2 # Estimate the total number of non-road crossing barriers (listed about	ove) to be removed or altered to improve passage.

D. Fish Ladders or Engineered Bypasses (not associated with Road Crossings)

1. Fish ladders will be installed/improved	# fish ladders to be installed/improved
2. Engineered bypasses will be installed/improved. This includes weirs, rock boulder step pools, and chutes constructed/roughened in bed rock. Do not count engineered bypasses located at a road crossing to improve passage at the crossing. These types of improvements should be identified above in section B as a Road Crossing Fish Passage Improvement.	# engineered bypasses to be installed/improved

E. Fish Passage Summary Metrics

- 1._____ % Estimate the percentage of total cost of the project applied to fish passage improvements
- 2. ____mi Estimate the total stream miles that will be made more accessible in the main channel and tributaries above the project (to nearest 0.01 mile). This metric summarizes the stream miles for all of the proposed passage improvements (defined above in Sections A-D). If a barrier exists upstream of the project, report the length made accessible up to that next upstream barrier.
- 3. ____# Estimate the total number of barriers (this includes road crossings, diversion dams, push up dams, wood or concrete dams, weirs, etc.) to be removed or altered to improve passage.

^{*}Estimate stream miles in the main channel and tributaries made more accessible above the crossing(s) (to nearest 0.01 mile). If a barrier exists upstream, report the length made accessible up to that next upstream barrier.

Instream Flow: *Projects that maintain and/or increase the instream flow of water.* Irrigation improvements that are primarily designed to improve water quality should be reported under Upland – Agriculture Management.

Check all proposed activities.				
☐ Irrigation practice improved to increase instream flows (e.g. install diversion headgate, replace open ditches with pipes)	☐ Water flow gauges installed to measure water use			
☐ This project will dedicate instream flow.	Other (explain):			
% Estimate the percentage of total cost of the project app	lied to instream flow activities			
mi. Estimate the miles of stream where increased flow is the result of decreased/eliminated water withdrawals				
cfs Estimate the increase in flow of water in the stream as a result of conservation effort (cubic feet per second)				
mm/dd/yyyy Initial start date of irrigation practice improve	ment			
mm/dd/yyyy Final end date of irrigation practice improven	nent (if improvement is permanent enter 12/31/9999)			
mm/dd/yyyy Water lease/agreement initial start date of no	withdrawal			
mm/dd/yyyy Water lease/agreement final end date of no wi	thdrawal (if lease/agreement is permanent, enter 12/31/9999)			
Check all proposed activities. Channel reconfiguration and connectivity (e.g., creating instream pools, meanders, improving floodplain connectivity, off-channel habitat, removal or alteration of levee or berm, removal of sediment)	Spawning gravel placement			
Channel structure - large wood placement	Plant Removal/control (instream)			
Channel structure - boulder placement	List scientific names of plants Carcass or nutrient placement: □ salmonid carcass; □ fish meal brick; □ other nutrient			
Channel structure placement (<u>other</u> than large wood or boulder placements), e.g., engineered structures or deflectors, barbs, weirs, etc.	Other (explain):			
Streambank stabilization through resloping and/or placing rocks, logs (e.g. revetments, gabions, barbs), or bioengineering on streambank				
% Estimate the percentage of total cost of the project appl	ied to instream habitat activities			
mi. Estimate the miles of stream to be treated with instream	habitat treatments (to nearest 0.01 mile)			

improvements costs will apply to the carcass placement, you would report 50%.

Kiparian Habitat: Projects above the ordinary high-wate Check all proposed activities.	ter mark of the stream and within the floodplain of the stream.
☐ Riparian planting	☐ Non-native/noxious plant control
Riparian exclusion fencing	☐ Vegetation management (e.g. prescribed burnings, stand thinning, stand conversions, silviculture)
Livestock exclusion by means other than fencing (includes placing obstacles to exclude livestock, people, vehicles, etc., but not for individual plant protection)	Debris/structure removal (OWEB funds cannot be used for general trash removal)
Water gap development (fenced livestock crossing or livestock bridge)	Other (explain): Do not report livestock water developments here, report livestock water developments under upland habitat treatments.
Conservation grazing management (e.g., rotation grazing)	
% Estimate the percentage of total cost of the project app	-
ac. Estimate the acres of riparian habitat to be planted (to	
ac. Estimate the acres of riparian habitat to be treated for	non-native/noxious weeds (to nearest 0.1 acres)
ac. Estimate the total riparian acres to be treated. (to neare	est 0.1 acres)
mi. Estimate the miles of riparian streambank to be treated	1 (to nearest 0.01 mi). Stream sides treated one two (Do not double count miles if a second side is treat
Upland Habitat: Projects implemented above the floodpi	lain. Check all proposed activities.
Planting/seeding for erosion control (e.g., convert from crops to native vegetation, plant area where non-native/noxious weeds removed, grassed waterways, windbreaks, filter strips) List scientific names of plants	Livestock Manure Management (e.g., feedlot improvements to reduce runoff, relocate/improve manure holding structures and manure piles to reduce/eliminate drainage into streams)
Slope stabilization (e.g., grade stabilization, landslide reparation, terracing slopes)	☐ Livestock/Wildlife Water Developments
Non-native/noxious plant control; List scientific names of plants:	Upland Livestock Management (<u>other</u> than livestock water developments), e.g., grazing plans, fencing
☐ Juniper removal/control	Restore Historic Upland Habitats (e.g. oak woodland, oak savannah, upland prairie restoration)
☐ Vegetation Management (<u>other</u> than non-native/noxious plant control or juniper removal, e.g. tree thinning, brush control, burning) List scientific names of plants:	Trail or Campground Improvements (to decrease upland erosion; these may extend into the riparian zone)
Upland Agriculture Management – (e.g., no/low-till, wind breaks, filter strips, crop rotation, terracing, water and sediment control basins, grade stabilization and irrigation improvements)	Other (explain):
Erosion control structures not already reported under Upland Agriculture Management or Road Drainage System and Surface Improvements.	
Estimate the percentage of total cost of the project wil	l apply to upland habitat activities
2 # Estimate the number of livestock/wildlife water developmen	nts
2_ac. Estimate the acres of upland habitat to be treated for non-natural	ative/noxious plants (to nearest 0.1 acres)
O_ac. Estimate the total acres of upland habitat to be treated developments (to nearest 0.1 acres)	(do not include acres of upland habitat affected by livestock water
	d to Livestock Manure Management. If you do not select Livestock

livestock manure runoff. You estimated that 33% of the total project cost will apply to upland habitat activities and one half of the upland improvements costs will apply to the feedlot relocation, you would report 50%.

_	ts designed to improve road impo surface improvements & reconst			r (explain):

_ac.	Estimate the total acres of estuarine habitat (existing or historic) to be treated (to nearest 0.1 acres)

<u>Section 3 - Salmon/Steelhead Populations Targeted and Expected Benefits to Salmon/Steelhead</u>

The information provided will be used by OWEB to better meet federal and state reporting requirements.	Completion of
this section is required but will not be used to evaluate this application for funding.	

This project is **NOT** specifically designed to benefit salmon or steelhead.

► If you check this box, STOP here.

<u>Targeted Salmon/Steelhead Populations</u>: Select one or more of the salmon ESUs (Evolutionary Significant Unit) or steelhead DPSs (Distinct Population Segment) that the project will address/benefit. For species where the ESU/DPS name is not known or determined, use the species name with unidentified ESU (e.g., Chinook salmon – unidentified ESU). Additional information on the designation and location of the salmon/steelhead populations can be found at: http://www.westcoast.fisheries.noaa.gov/maps_data/species_population_boundaries.html

Chinook Salmon (Oncorhynchus tshawytscha)		Coho	Coho Salmon (O. kisutch)	
	Deschutes River summer/fall-run ESU		Lower Columbia River ESU	
	Lower Columbia River ESU		Oregon Coast ESU	
\boxtimes	Mid-Columbia River spring-run ESU		Southern Oregon/Northern California ESU	
	Oregon Coast ESU		unidentified ESU	
	Snake River Fall-run ESU		Steelhead (O. mykiss)	
	Snake River Spring/Summer-run ESU		Klamath Mountains Province DPS	
	Southern Oregon and Northern California Coastal ESU		Lower Columbia River DPS	
	Upper Klamath-Trinity Rivers ESU		Middle Columbia River DPS	
	Upper Willamette River ESU		Oregon Coast DPS	
	unidentified ESU		Snake River Basin DPS	
Chum	Salmon (O. keta)		Washington Coast DPS (SW Washington)	
	Columbia River ESU		Upper Willamette River DPS	
	Pacific Coast ESU		Steelhead/Trout unidentified DPS	
	unidentified ESU			

Expected Benefits:

Write a brief description of the goals and purpose of the project and how it is expected to benefit salmon/steelhead or salmon/steelhead habitat. See Application Instructions for helpful examples.

With the installation of two additional water sources for this pasture, the cattle will not loaf in the riparian are as much preventing erosion and unheathly runoff from entering the stream. This will improve fish habitat immensely.

10. Project Budget- Itemize projected costs for each of the following "Expense Categories" that apply to your project. A minium of 25% match--cost share--in-kind/cash (column 4) is required. See application

Totals automatically round to the nearest dollar

Expense Category	No. of Units	Unit Cost	Cost Share In- Kind/ Cash (Match)	OWEB Funds	Description what will be purchased or done and who will provide the item/perform the work
SALARIES, WAGES AND BENEF	ITS (Inclu	des time dev	oted to this proj	ect by applic	cant employees for whom payroll taxes are paid)
