- 2. Describe the current watershed PROBLEM(s) you are seeking to address.
  - Duane Neiffer runs 30 to 40 pairs on this 360 acre property from June 15th to October 15th annually. The animals are watered at two newly developed water sources (OWEB 26-16-004). Duane recently installed ~1,800 ft. of fence on the south side of Blakes Ranch Road to exclude the cattle from North Fork Willow Creek. This left 16 acres in the northeast corner that is open to grazing due to no fence along the eastern border. This leaves a section of North Fork Willow Creek open to grazing from neighboring cattle. Duane would love nothing more than to keep cows of the creek, and he has no plans to ever graze this field should he get it fenced off. He has noticed a decrease in riparian vegetation and several bare soil sites where the animals enter the creek. The Willow Creek Agricultural Water Management Area Plan calls for control of soil erosion, prevention of pollution caused by the introduction of wastes into waters of the state and the need to provide adequate riparian vegetation, consistant with site capability, for streambank stability and stream shading.
- 3. Describe the SOLUTION(s) you are proposing to address the current problem(s). Attach a site map, color photo(s), and (if applicable) preliminary project drawings or designs.

  1,200 ft. of 3-strand barb wire fence will be installed along the eastern boundary from Blakes Ranch Road to Hanna/Arbuckle Road, where it will then head NW to meet up with existing fence on the north boundary (Please see attached map and photos). A cattle guard will be installed across Blakes Ranch Road by the County to meet their specifications. This project would protect 1,600 ft. of North Fork Willow Creek from livestock pressure. This stretch of stream has enough trees and shrubs to provide a sufficient seed source for natural re-establishment of riparian vegetation. The fence will be installed to NRCS standards and specifications.

| 4. Insurance Information If applicable, select all the activities that are parequired to submit the DAS Risk Assessment Tool | ort of your project (check all that apply). You will be for items 1-5:                                 |

|----|--|
|    | Yes <u>x</u> No  |

**10. Project Partners.** Show all anticipated funding sources, and indicate the dollar value for cash or in-kind contributions. Be sure to provide a dollar value for each funding source. If the funding source is providing in-kind contributions, briefly describe the nature of the contribution in the Funding Source Column. In the Amount/Value Column, provide a total dollar amount or value for each funding source.

| Funding Source   | Cash | In-Kind | Amount/  |
|--|------|---------|----------|
| Name the partner and contribution  |      |         | Value    |
| OWEB: Cattle guard and installation. Admin & reporting                     | Х    |         | 7,900.00 |
| Landowner: Fencing materials, install and Land-use form                    |      | Х       | 2,750.00 |
| Morrow SWCD: Project Management  |      | Х       | 200.00   |
|  |      |         |          |
|  |      |         |          |
|  |      |         |          |
|  |      |         |          |
| Total Estimated Funds (add all amounts in the far right column) \$10,850.0 |      |         |          |

The total should equal the total cost of the project on page 1

**11. Project Budget (Word).** Itemize projected costs for each budget category that apply to your project. A minimum of 25% match is required. See application instructions and additional team conditions for further guidance.

PLEASE NOTE: Budgets may be submitted in either Word or Excel formats. Forms can be found here: <a href="http://www.oregon.gov/OWEB/GRANTS/smgrant\_forms.shtml">http://www.oregon.gov/OWEB/GRANTS/smgrant\_forms.shtml</a>

Fill in the amounts, rounded to the nearest dollar; please do not include cents.

We, the undersigned, attest that to the best of our knowledge the information contained in this application is true, that the proposed project is not required by a state or federal agency directive, and that the project will be completed within 24 months from the date of the team funding recommendation of the application. We understand that the submitted application is a matter of public record.

#### Also, should funding for this project be awarded we understand:

- 1) **We may not incur** any project expenses until all designated signatories have signed an OWEB grant agreement,
- 2) We will be required to provide proper accounting of project expenses, and
- 3) We will be required to provide necessary and normal maintenance to sustain the value of the project once it is completed.

By their signatures, the **landowner(s)** attest that they have no plans to sell their property as of the date of this application, are authorized to sign as landowner, and they agree to provide, upon prior request and at a mutually acceptable time, site access to the applicant or representatives of OWEB for a period up to two years following project completion to allow project work to be implemented, monitored, and maintained.

### **Racial and Ethnic Impact Statement**

This form is used for information purposes only and must be included with the grant application.

Chapter 600 of the 2013 Oregon Laws require applicants to include with each grant application a racial and ethnic impact statement. The statement provides information as to the disproportionate or unique impact the proposed policies or programs may have on minority persons<sup>1</sup> in the State of Oregon if the grant is awarded to a corporation or other legal entity other than natural persons.

| 1.        |                       | The proposed grant project policies or programs could have a disproportionate or unique <b>positive</b> impact on the following minority persons:   |
|-----------|-----------------------|---|
|           |                       | Indicate all that apply:  Women Persons with Disabilities African-Americans Hispanics Asians or Pacific Islanders American Indians Alaskan Natives  |
| 2.        |                       | The proposed grant project policies or programs could have a disproportionate or unique <b>negative</b> impact on the following minority persons:   |
|           |                       | Indicate all that apply:  Women Persons with Disabilities African-Americans Hispanics Asians or Pacific Islanders American Indians Alaskan Natives  |
| 3.        |                       | The proposed grant project policies or programs <b>will have no</b> disproportionate or unique impact on minority persons.  |
| po<br>pro | licie<br>ovid<br>EREE | checked numbers 1 or 2 above, on a separate sheet of paper, provide the rationale for the existence of each programs having a disproportionate or unique impact on minority persons in this state. Further e evidence of consultation with representative(s) of the affected minority persons. BY CERTIFY on this 15th day of August, 2018, the information contained on this form and any nament is complete and accurate to the best of my knowledge. |
|           |                       | Signature Printed Name: Kevin D. Payne Title: Natural Resource Specialist   |
|           |                       |   |

<sup>&</sup>lt;sup>1</sup> "Minority persons" are defined in SB 463 (2013 Regular Session) as women, persons with disabilities (as defined in ORS 174.107), African-Americans, Hispanics, Asians or Pacific Islanders, American Indians and Alaskan Natives.

#### **Restoration Metrics Form**

OWEB receives a portion of its funds from the federal government and is required to report how its grantees have used both federal and state funds. The information you provide in the following form will be used for federal and state reporting purposes.

Please complete all portions of the form below as they apply to your project and submit all pages (do not exclude any pages). Please provide specific values, do not enter values like "2-3" or "<100". Enter your best approximation of what the project will accomplish.

If you have any questions, please contact Cecilia Noves, OWEB Federal Reporting Coordinator, at 503-986-0204 (cecilia.noyes@state.or.us) or Ginger Lofftus, OWEB PCSRF Reporting Assistant, at 503-986-5372 (ginger.lofftus@state.or.us)

#### Section 1. Project Overview

|  | nswer all five questions below, even if you have ans e grant application.  | wered a similar question in a previous section in  |  |  |  |
|--|--|--|--|--|--|
| 1. Land Use Setting: CHECK ONE BOX ONLY. |  |  |  |  |  |
|  | Urban/Suburban/Exurban (Projects located within urban growth boundaries or rural residential areas)  | Rural (Projects located outside urban growth boundaries or rural residential areas.)   |  |  |  |
| 2.                                       | 2. Dominant Watershed Setting: CHECK ONE BOX ONLY. <u>Example</u> : Your project involves managing erosic in the upland area with some erosion control extended to the riparian area. Because most of the work is to occur in the upland area, you would check <u>only</u> the Upland box below.   |  |  |  |  |
|  | Estuary (where freshwater meets and mixes with saltwater of ocean tides.)  | Riparian (adjacent to a water body, within the active floodplain.)   |  |  |  |
|  | Instream (below the ordinary high-water mark or within the active channel — includes fish passage.)  | <ul> <li>☑ Upland (above the floodplain.)</li> <li>☐ Groundwater (Projects that recharge groundwater or primarily affect the subsurface water table.)</li> </ul> |  |  |  |
|  | Wetland (areas inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of vegetation typically adapted for life in saturated soil conditions.  |  |  |  |  |
| 3.                                       | Total Acres Treated: Total Stream Miles Tre (do not include upstream stream miles made accessible  |  |  |  |  |
| 4.                                       | Project Monitoring: All OWEB funded restoration projects require post-implementation status reporting including photo point monitoring. Please indicate below: 1) the location of the monitoring activities relative to the project, including photo point locations, 2) whether effectiveness monitoring is planned, and 3) whether additional monitoring will be conducted for this project. |  |  |  |  |
|  | <b>4.1)</b> Identify the location for the planned monitoring activities relative to the restoration project location. Check as many boxes as apply.  |  |  |  |  |
|  |  | Upstream Upslope   |  |  |  |
|  | 4.2)   Effectiveness monitoring will be conducted for this project. Please note that effectiveness monitoring cannot be funded with OWEB Small Grant Funds. To review effectiveness monitoring and post-implementation status reporting definitions click on the link to the OWEB Web site below.   http://www.oregon.gov/OWEB/MONITOR/effective_monitoring.shtml                              |  |  |  |  |

| 4.3) Will this project conduct monitoring activities beyond th reporting and photo point monitoring?   | e required post-implementation status   |  |  |  |
|--|---|--|--|--|
| Yes No If you answer yes, select the monitoring activities below, if you answer no proceed to Section 2.   |   |  |  |  |
| Check all proposed monitoring activities   |   |  |  |  |
| Adult Fish presence/absence/abundance/distribution survey(s)   | ☐ Spawning surveys  |  |  |  |
| ☐ Juvenile Fish presence/absence/abundance/distribution survey(s)  | ☐ Upland vegetation (Presence/Absence)  |  |  |  |
| ☐ Instream Habitat surveys   | ☐ Water quality   |  |  |  |
| ☐ Macroinvertebrates   | ☐ Water quantity  |  |  |  |
| ☐ Noxious weed (Presence/Absence)  | ☐ Photo Points  |  |  |  |
| ☐ Riparian vegetation (Presence/Absence)   | Other (explain):  |  |  |  |
| project. Data about <b>completed</b> projects will be reported at the en Restoration Inventory (OWRI). For each activity type where you en cost of the project (OWEB and <b>all</b> other funding sources, shown in activity. The sum of all of the activity cost percentages should equiproject management and other general project costs among the percentages. <b>Example</b> : A project will remove a fish passage barrier, place large You would enter the appropriate metrics into the Fish Passage, Instructions of this form. Then, estimate the percentage of the total composition of the Possage activities, 25% towards Instream Habitat activities. <b>Fish Screening Projects:</b> Projects that result in the install prevent fish from passing into areas that do not support fish survivalents. | ter metrics, estimate the percentage of the total III. 9.of this application) that applies to the lal 100%. Please distribute all administrative, various project activities when estimating boulders instream, and plant a riparian buffer. tream Habitat, and Riparian Habitat activity lost of the project for each activity. For instance: activities, and 55% towards Riparian Habitat |  |  |  |
| Note: OWEB funds cannot be used for fish screening projects  |   |  |  |  |
|  | lied to fish screening activities   |  |  |  |
| New Fish Screens Installed   |   |  |  |  |
| # Estimate the number of <b>new</b> screens installed (do not correplaced)   | unt diversions where existing screens are   |  |  |  |
| cfs Estimate the cubic feet per second of flow influenced by   | new screen(s) installed (to nearest 0.01 cfs)   |  |  |  |
| Existing Screens Replaced, repaired or modified  |   |  |  |  |
| # Estimate the number of <b>existing</b> screens replaced, repair  | ed or modified  |  |  |  |
| cfs Estimate the cubic feet per second of flow influenced by <b>existing</b> screen(s) screens (to nearest 0.01 cfs)   |   |  |  |  |

**Fish Passage Improvement:** Projects that improve fish migration by addressing a migration barrier problem. Complete sections A-E as they apply to the proposed project. For projects that improve fish passage at road crossings complete both sections A (define the problem) and B (define the treatment). Non-road crossing improvements are reported in sections C and D. Section E should be completed for all fish passage improvement projects. Refer to the application instructions for additional information and examples.

#### A. Road Crossings - Define Existing Fish Passage Problem

| 1. Culverts hindering fish passage | # crossings |
|------------------------------------|-------------|
| 2. Bridges hindering fish passage  | # crossings |
| 3. Fords hindering fish passage    | # crossings |

#### B. Road Crossings - Define the Fish Passage Improvements to be implemented by this project

| 1. Culverts installed/improved -Improvements include installing baffles inside culverts or installing/improving engineered bypasses (e.g. weirs) directly below a culvert outlet to improve passage. | # crossings | str. mi with improved access* |
|--|-------------|-------------------------------|
| <b>2. Bridge</b> s installed/improved -Improvements include installing/improving engineered bypasses (e.g. weirs) directly below a bridge crossing to improve passage.                               | # crossings | str. mi with improved access* |
| 3. Fords installed/improved  | # crossings | str. mi with improved access* |
| 4. Road Crossings removed and not replaced   | # crossings | str. mi with improved access* |

#### C. Fish Passage Barriers - Other than Road Crossings

| <del>-</del>   |  |
|--|--|
| Type(s) of barriers to be treated/removed to improve fish passage.         | Diversion Dam Push-up Dam Wood or Concrete Dam Weir (not associated with a road crossing) Logs Debris Boulder/Rock Barrier (not weirs) Landslide Other (explain) |
| 2 # Estimate the total number of <b>non-road</b> crossing barriers (listed | above) to be removed or altered to improve   |
| passage.   |  |

#### D. Fish Ladders or Engineered Bypasses (not associated with Road Crossings)

| 1. Fish ladders will be installed/improved  | # fish ladders to be installed/improved        |
|---|--|
| 2. Engineered bypasses will be installed/improved. This includes weirs, rock boulder step pools, and chutes constructed/roughened in bed rock. Do not count engineered bypasses located at a road crossing to improve passage at the crossing. These types of improvements should be identified above in section B as a Road Crossing Fish Passage Improvement. | # engineered bypasses to be installed/improved |

#### E. Fish Passage Summary Metrics

| 4  |   | Fig. Contract and the second account of the second |                   | C 11        | C             | . 1          |             |
|----|---|--|-------------------|-------------|---------------|--------------|-------------|
| Ι. | % | Estimate the percentage                            | e or total cost o | the project | applied to it | sn passage i | mprovements |
|    |   |  |                   |             |               |              |             |

2. \_\_\_\_ mi Estimate the total stream miles that will be made more accessible in the main channel and tributaries above the project (to nearest 0.01 mile). This metric summarizes the stream miles for all of the proposed passage improvements (defined above in Sections A-D). If a barrier exists upstream of the project, report the length made accessible up to that next upstream barrier.

<sup>\*</sup>Estimate stream miles in the main channel and tributaries made more accessible above the crossing(s) (to nearest 0.01 mile). If a barrier exists upstream, report the length made accessible up to that next upstream barrier.

| 3# Estimate the total number of barriers (this includes road crossings, diversion dams, push up dams, wood or concrete dams, weirs, etc.) to be removed or altered to improve passage.   |  |  |  |  |
|--|--|--|--|--|
| Instream Flow: Projects that maintain and/or increimprovements that are primarily designed to improve was Agriculture Management. Check all proposed activities.   | ater quality should be reported under Upland –   |  |  |  |
| <ul> <li>Irrigation practice improved to increase instream<br/>flows (e.g. install diversion headgate, replace<br/>open ditches with pipes)</li> </ul>   | ☐ Water flow gauges installed to measure water use                                       |  |  |  |
| ☐ This project will dedicate instream flow.  | Other (explain):   |  |  |  |
| % Estimate the percentage of total cost of the p   | roject applied to instream flow activities   |  |  |  |
| mi. Estimate the miles of stream where increased f withdrawals   | low is the result of decreased/eliminated water  |  |  |  |
| cfs Estimate the increase in flow of water in the str second)  | ream as a result of conservation effort (cubic feet per                                  |  |  |  |
| mm/dd/yyyy Initial start date of irrigation practice   | improvement  |  |  |  |
| mm/dd/yyyy Final end date of irrigation practice 12/31/9999)   | improvement (if improvement is permanent enter   |  |  |  |
| mm/dd/yyyy Water lease/agreement initial start d   | ate of no withdrawal   |  |  |  |
| mm/dd/yyyy Water lease/agreement final end da enter 12/31/9999)  | te of no withdrawal (if lease/agreement is permanent,                                    |  |  |  |
| Instream Habitat: Projects that are designed to in activities.   | mprove instream habitat conditions. Check all proposed                                   |  |  |  |
| ☐ Channel reconfiguration and connectivity (e.g., creating instream pools, meanders, improving floodplain connectivity, off-channel habitat, removal or alteration of levee or berm, removal of sediment)  | Spawning gravel placement  |  |  |  |
| ☐ Channel structure - large wood placement   | ☐ Plant Removal/control (instream)  List scientific names of plants                      |  |  |  |
| ☐ Channel structure - boulder placement  | ☐ Carcass or nutrient placement: ☐ salmonid carcass; ☐ fish meal brick; ☐ other nutrient |  |  |  |
| Channel structure placement ( <u>other</u> than large wood or boulder placements), e.g., engineered structures or deflectors, barbs, weirs, etc.   | Other (explain):   |  |  |  |
| <ul> <li>Streambank stabilization through resloping<br/>and/or placing rocks, logs (e.g. revetments,<br/>gabions, barbs), or bioengineering on<br/>streambank</li> </ul>   |  |  |  |  |
|  |  |  |  |  |
| mi. Estimate the miles of stream to be treated with instream habitat treatments (to nearest 0.01 mile)   |  |  |  |  |
| Estimate the percentage of insteam activity costs for carcass or nutrient placements. If you do not select carcass/nutrient placements as an instream activity, leave this value blank. Example: Your project will place salmon carcasses. You estimated that 25% of the total project cost will apply to instream habitat activities and one half of the instream improvements costs will apply to the carcass placement, you would report 50%. |  |  |  |  |

| <b>Riparian Habitat:</b> Projects above the ordinary h the stream. <b>Check all proposed activities</b> .  | igh-water mark of the stream and within the floodplain of  |  |
|--|--|--|
| ☐ Riparian planting  | ☐ Non-native/noxious plant control   |  |
| Riparian exclusion fencing   | ☐ Vegetation management (e.g. prescribed<br>burnings, stand thinning, stand conversions,<br>silviculture)  |  |
| Livestock exclusion by means other than fencing (includes placing obstacles to exclude livestock, people, vehicles, etc., but not for individual plant protection)   | Debris/structure removal (OWEB funds cannot be used for general trash removal)   |  |
| ☐ Water gap development (fenced livestock crossing or livestock bridge)  | Other (explain): Do not report livestock water developments here, report livestock water developments under upland habitat treatments.   |  |
| % Estimate the percentage of total cost of the   | project applied to riparian habitat activities   |  |
| ac. Estimate the acres of riparian habitat to be p   | lanted (to nearest 0.1 acres)  |  |
| ac. Estimate the acres of riparian habitat to be tr  | eated for non-native/noxious weeds (to nearest 0.1 acres)  |  |
| ac. Estimate the total riparian acres to be treated  | d. (to nearest 0.1 acres)  |  |
| mi. Estimate the miles of riparian streambank to I Stream sides treated $\square$ one $\square$ two (Do not double count   |  |  |
| Upland Habitat: Projects implemented above the   | ne floodplain. Check all proposed activities.  |  |
| Planting/seeding for erosion control (e.g., convert from crops to native vegetation, plant area where non-native/noxious weeds removed, grassed waterways, windbreaks, filter strips)  | Livestock Manure Management (e.g., feedlot improvements to reduce runoff, relocate/improve manure holding structures and manure piles to reduce/eliminate drainage into streams) |  |
| List scientific names of plants  Slope stabilization (e.g., grade stabilization, landslide reparation, terracing slopes)   | Upland Livestock Management (other than livestock water developments), e.g., grazing plans, fencing  |  |
| Non-native/noxious plant control; List scientific names of plants:   | Restore Historic Upland Habitats (e.g. oak woodland, oak savannah, upland prairie restoration)   |  |
| ☐ Juniper removal/control  | Livestock/Wildlife Water Developments  |  |
| ☐ Vegetation Management (other than non-native/noxious plant control or juniper removal, e.g. tree thinning, brush control, burning)  List scientific names of plants:   | ☐ Erosion control structures not already reported under Upland Agriculture Management or Road Drainage System and Surface Improvements.  |  |
| Upland Agriculture Management (e.g., no/low-till, wind breaks, filter strips, crop rotation, terracing, water and sediment control basins, grade stabilization and irrigation improvements)  | Other (explain): Fencing installed primarily in the uplands but will serve as riparian exclusion fence.  |  |
| 100 % Estimate the percentage of total cost of the   | project will apply to upland habitat activities  |  |
| # Estimate the number of livestock/wildlife wat  | er developments  |  |
| ac. Estimate the acres of upland habitat to be   | reated for non-native/noxious plants (to nearest 0.1 acres)  |  |
| ·  | be treated (do not include acres of upland habitat   |  |
| Estimate the percentage of upland activity costs applied to Livestock Manure Management. If you do not select Livestock Manure Management as an upland activity, leave this value blank. <i>Example:</i> Project will relocate a feedlot to reduce livestock manure runoff. You estimated that 33% of the total project cost will apply to upland habitat activities and one half of the upland improvements costs will apply to the feedlot relocation, you would report 50%. |  |  |

| <b>Road Activities:</b> Projects designed to improve road impacts to watersheds. Check all proposed activities.                         |  |   |   |  |
|---|--|---|---|--|
| Road drainage system and surreconstruction  | face improvements &  | Othe  | er (explain):   |  |
| Road closure, relocation, oblite (decommissioning)  | eration  |   |   |  |

# Section 3. Salmon/Steelhead Populations Targeted and Expected Benefits to Salmon/Steelhead

The information provided will be used by OWEB better to meet federal and state reporting requirements. Completion of this section is required but will not be used to evaluate this application for funding.

☐ This project is **NOT** specifically designed to benefit salmon or steelhead.

► If you check this box, STOP here.

Targeted Salmon/Steelhead Populations: Select one or more of the salmon ESUs (Evolutionary Significant Unit) or steelhead DPSs (Distinct Population Segment) that the project will address/benefit. For species where the ESU/DPS name is not known or determined, use the species name with unidentified ESU (e.g., Chinook salmon – unidentified ESU). Additional information on the designation and location of the salmon/steelhead populations can be found at: <a href="http://www.westcoast.fisheries.noaa.gov/maps">http://www.westcoast.fisheries.noaa.gov/maps</a> data/species population boundaries.html

| Chinook Salmon (Oncorhynchus tshawytscha) |   | Coho Salmon (O. kisutch) |                       |                                  |
|---|---|--------------------------|-----------------------|----------------------------------|
